Margin Print: Panes are cut from sheets of 250 stamps, printed by Harrisons, separated into 100/100/50 stamp-units by gutters. All stamps are printed in a normal, upright way, there are no tête-bêche in the sheet. When assembling a booklet panes are bound either upright, viz. with left hand margin or inverted, viz. right hand margin. On a margin you may find either a vertical gutter print in a box or a stroke and a horizontal bar.

Note: Only the listed booklets 1.1, 1.6, and 1.8 have been seen and inspected by the authors, 1.2 and 1.3 were described in detail by Dr. E. Bowman (The Holy Land Philatelist, 1960). It is understood that at least twelve different booklets exist of this series no. 1, with identical contents, but distinguishable by their advertisements on covers and interleaves. Dr. Bowman also lists six booklets but without giving full details on the advertisements. Bale adds another variety, - all without mentioning all the various covers and interleaves, but coverpage 4 (outside back cover) and interleaf 8 only.

WBC	Bale	Coverpage 4 = o.b.c.	Interleaf 8 (front = page 15)
1.4	B1	General Electric	Palestine Kupat Am Bank, Engl.
1.5	B2	General Electric	Kollenscher, Engl.
1.7	B4	Palgin	Amdursky, Engl.
1.9	B5	General Electric	Amdursky, bil.
1.10	B5a	General Electric	To Let, Engl.
1.11	B6	Palgin	Anglo Palestine Bank, Hebrew
1.12	B7	Palgin	Anglo Palestine Bank, Engl.

Full description of all covers and interleaves with the language(s) used is desirable of all the booklets, also crosscheck the listed ones, please. Every help will be appreciated.

Stamps are typographed and printed by Messrs. Harrison & Sons Ltd., London. They were delivered to Palestine through the hands of The Crown Agents, and in entire sheets. These sheets were cut into (booklet) panes in Palestine, and assembled into locally produced covers, also including various advertising interleaves.

As almost all booklets were used by non-philatelic public, very few booklets remained intact with both covers, interleaves and panes of stamps. Booklets without stamps - but with all covers and interleaves intact - are collected as well. Those "booklets" are valued at 20-50% of the intact booklet's quotation. Collectors are warned of made-up booklets from sheet-stamps.

All Palestine booklets contain stamps of the Pictorial Issue, released from June 1, 1927 to 1942, on vertically ribbed paper. However, a few panes are known on horizontally ribbed paper. They are very rare.

MIDDLE EAST

INTERIM PERIOD

carnets-markenhftchen-postzegelboekjes-häftchen-booklets-carnets-markenhftchen-postzegelboekjes-häftchen-booklets-carnets-markenhftchen

INTERIM PERIOD: DOAR-OVERPRINTS ON CHARITY STAMPS

After a time of unrest and under the light of the approaching end of the British Mandate for Palestine several charity vignettes of the Jewish National Fund were declared valid for postal use after having been surcharged with a zinc-, rubber- or printed stamp "DOAR", viz. Mail, in Hebrew, by the MINHELET HA'AM, the People Command.

On or slightly after May 1, 1948 these stamps came into postal use. They were valid until May 22, 1948, i.e. one week after the definitive Israeli stamps were released, and simultaneously with them for one week.

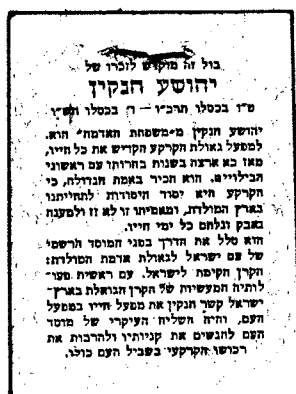

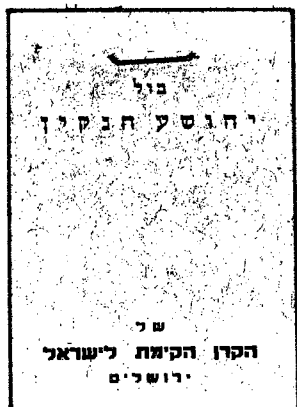

Only the listed Hankin - stamp has, so far, been found in booklet form. It shows the portrait of Yehoshua Hankin, a co-founder of the town of Rishon Lezion and initiator of Jewish settlements.

Charity stamps do have inscriptions in Hebrew only. The postal use of the DOAR-stamps were limited to domestic/inland-mail. Postal communications to countries abroad were interrupted after May 5, 1948.

You may consider these DOAR-stamps as the last Palestine-stamps, because they were issued before the proclamation of the State of Israel. If you find them in catalogues they are mostly listed prior to "Israel". However, both the Mandate stamps of Palestine and the DOAR-overprints are certainly forerunners to the Israeli postal issues.

The British Mandate over Palestine terminated on 14 May, 1948. The same day the Jewish National Council at Tel Aviv proclaimed the State of Israel. British forces left the country on 15 May, 1948, on Shabat, the day of rest. Immediately troops of several Arab states invaded Palestine/Israel, cutting the communications between the scattered Jewish settlements. The War of Independance began. The first Israeli postage stamp issue was released on May 16, 1948, but it was not available at every Post Office that day.

INTERIM PERIOD

ISRAËL

carnets-markenheftchen-postzegelboekjes-häftchen-booklets-carnets-markenheftchen-postzegelboekjes-häftchen-booklets-carnets-markenheftchen

Currency: 1948 1000 mils = 1 Israeli Pound
 1949 1000 prutot = 1 Israeli Pound
 1960 100 agorot = 1 Israeli Pound
 1980 100 new agorot = 1 Shekel
 1992 100 agorot = 1 New Shekel, banking abbr.: ILS

All descriptions are based on the Hebrew way of writing, i.e. from the right to the left. Consequently covers, panes and interleaves are bound on the right hand side. The front is that coverpage with the table of contents on, also named coverside 1.

Panes for booklets 1, 2 and 3 are cut from ordinary sheets of 100 stamps, only the right three rows were used to produce 5 panes of 6 stamps each, the remaining balance of 70 stamps being left for counter use.

Specific booklet sheets were printed for most other booklets, so for the second and third Coin Issues, sheets of 90 subjects, and the UPU-Issue in sheets of 64, the tête-bêches in the printing sheet being cut into booklet panes. Miscut panes with short perforations are normal and do not diminish the stated valuations.

Valuations are for pristine booklets with an excellent general appearance, with clean and uncreased covers, the staple without rusty stains.

Pictures are usually shown in 150% of the actual size for the stamps and 70% of the real size for booklet covers.

How to distinguish between the booklets and the stamps deriving from the three Coin Issues?

- by the size of the stamp
- by the inscription on the left hand side of the stamp
- by the margin print.

- Postal advices on front page, in Arabic
- 1: In order to cooperate with the Post Office in the distribution of your correspondence, write your address with clear letters according to the following:
 - (1) Name of addressee, title and position
 - (2) Street name and number
 - (3) City, Country and State
 - 2: Don't Forget
 - (1) to revise the address before posting the letter
 - (2) to write your name and address at the back of the letter and inside on the letter
 - (3) to stick the stamp on the upper right corner above the address
 - (4) to avail a small postbox next to your home door to distribute the mail, because postmen are not responsible to go upstairs to the houses to distribute the mail
 - 3: Don't enclose any cash money inside the normal mail and don't write your mailing address in Arabic for any postage abroad, instead write it in Latin letters
 - 4: Booklets containing 24 stamps of 5 milliemes are sold in the post offices for 120 milliemes each.

Common notes on Egyptian booklet issues:

The first two booklets were manufactured by De La Rue & Co., London from sheets of 240 stamps, comprising four panes of 60 rows of 10 booklet panes of six stamps (2x3).

Booklet no. 3: As stamps of this issue were printed in sheets of 200, comprising two panes of 100 in 10 rows of 10, a special forme of 240 subjects was produced and printing carried out on stocks of paper remaining from the previous stamp issues. This format produced stamps with sideways watermark and, depending on the relative position of the sheets when put to press, can be found with the crescent open to either right or left (SG77A or SG77AB). From 1921 the printing of Egyptian postage stamps was carried out by Harrison & Sons Ltd of London and from this date a new watermark, the multiple star and crescent, came into use.

Booklet no. 4: This booklet had white paper interleaves between the panes of stamps but in this case there were five such interleaves and each carried an advertisement either side in either English, French or Arabic. Advertisements were also printed on both sides of the back cover and inside the front cover, with details of the booklet make-up and price printed in English and Arabic on the outer front cover.

MIDDLE EAST

EGYPT

carnets-markenhftchen-postzegelboekjes-häftén-booklets-carnets-markenhftchen-postzegelboekjes-häftén-booklets-carnets-markenhftchen

Booklet no. 5: Interleaving now reverted to plain paraffin waxed sheets and the advertising experiment abandoned.

Booklet no. 6: On March 15, 1922 Egypt became an independent Kingdom and the then current stamp issues received an overprint of a Royal Crown and an Arabic inscription with date commemorating the event. A special forme was prepared by the National Printing Works at Boulac comprising six impressions (3x2) of the overprint (small crown, type II, see Zeheri Catalogue, 1972, pp 71 & 72). Existing booklets (no. 5) were taken apart, each pane of stamps overprinted separately and the booklets reconstituted with a single staple fixing. Booklet panes show the marks of the two stapling operations.

Booklet no. 9: Subsequent issues of Egyptian stamps were printed by the Egyptian State Survey Department and from 1926 to 1943 booklets were manufactured from sheets of 120 stamps comprising two panes of 60 (each 6x10) separated by a vertical plain gutter in width of a normal stamp. During the reign of King Fuad the panes of 60 stamps intended for booklet manufacture contained three stamps upright and three stamps inverted in each row, thus when the panes were cut and bound on the left hand side, an equal quantity of booklets had upright and inverted watermarks. From 1937 a change in the method of booklet manufacture is observed and booklets are stitched at either right or left. Sheets of stamps still contain 120 stamps in two panes of 60 but did not have the tête-bêche arrangement and any inverted watermarks are the result of sheets of paper being inverted when put to press. The stamps showing King Farouk in civilian dress and having watermark Royal Crown and Arabic letter F.

Control numbers are to be found twice on a printing sheet, at bottom left an Arabic letter plus a 2-digit Arabic number and at top right a Latin letter plus a 2-digit number, i.e. A 41. These control numbers appear on the margin of every 20th booklet pane, either in Arabic when the booklet is stitched left or Latin when stitched right. Usually these control numbers are covered by the stitching. Val. 10x.

Booklets no. 13 and 14 had a further innovation in that the interleaving was changed to a brownish white paper with postal advice in Arabic to the purchaser.

In 1941 booklet manufacture was stopped and the sheets of stamps prepared for this purpose were distributed to Post Offices for over-counter sales. These stocks contained stamps of 20 milliemes denomination but as far as can be ascertained this value was never included in any booklet issue. 20 millieme blocks are extant but none so far as we are aware show the tell-tale booklet stitching marks and it is somewhat of a mystery why Harriet Work included her W14 unless, having seen sheets of control blocks of this stamp forme, she assumed that booklets had been manufactured.

Booklet no. 15: Once again booklet production ceased and the sheets of stamps were forwarded to Post Offices for sale over the counter.

From 1951 booklet manufacture recommenced with the stamps now depicting King Farouk in military uniform. Sheets of stamps for booklet production underwent a further change and each printing sheet which previously held 120 impressions now had only 54, disposed as 9 booklet sheets of 6 (3x2) and printed in three rows of three. Each booklet pane was cut directly from the sheet and formed a 'miniature sheet' with selvedge on all sides, thus allowing left or right hand stitching at will. Control numbers were lost during the cutting of these sheets.

Booklet no. 18: Manufactured in exactly similar manner to #16 these stamps also had the Royal Crown and Arabic watermark.
